

Energy Monitoring

Take the guesswork out of where energy is being used in your business.

Energy consumption is a key business overhead – but it can be easily monitored to reduce costs and grow your bottom line.

WHAT WILL ENERGY MONITORING AND TARGETING DELIVER?

- Fact based identification of the best opportunities for energy savings in your business by monitoring where energy is being used.
- Assessment and prioritisation of those energy saving areas.
- An energy targeting programme, created with you, to tackle the most important areas.
- A small investment to earn healthy energy savings.

THE DETAILS

Assessment

- Data collection and systems check at each site, zeroing in on the quick and longer-term savings potential.
- Target setting, calling out where consumption can be reduced and the timeframe involved.
- Electricity network tariff check to double check your pricing plans are right for your business.

Installation of monitoring system

- Installation of a monitoring system to record 15-minute-interval usage data, updating daily to an online reporting tool.
- Optional weather station monitoring that throws outside temperature into the energy saving equation.
- Optional text messaging and/or email alarms for abnormal energy use like overnight loads or high peak demand.

Ongoing monitoring and reporting

- Longer-term monitoring and analysis from the Energy Monitoring system – with a summary report highlighting any anomalies that come up.
- An option to set up alarms for individual base-load and peak demand thresholds.

ALL THE HELP YOU NEED FROM YOUR ACCOUNT MANAGER

Your Account Manager can set the wheels in motion by:

- Giving you an overview of the process and roll out.
- Speaking to our Energy Solutions team who can project manage the entire process, from onsite inspection to the final commissioning.
- Providing information and advice on potential grants or funding applications.

Deferred payment option

We can also discuss the option to pay back costs through monthly instalments on your electricity invoice. This can be done over 12, 24 or 36 months, with payment in full should your contract be broken during the repayment term.

WE'RE HERE TO HELP

For more information please contact your Account Manager or our Business team on:

P: 0800 271 271

E: business.support@contactenergy.co.nz

We can manage the whole process from start to finish
