

1. Connect to your modem via Wire or Wireless
2. Open a browser (Chrome, Firefox, Safari, etc.) and enter 192.168.1.1 in the address bar
3. Enter **admin** as both the username and password and **Sign In**
4. Click the **Advanced** tab up the top

The screenshot shows the TP-Link Advanced Setup page. The top navigation bar includes 'Quick Setup', 'Basic', and 'Advanced' (highlighted with a red box). The left sidebar contains 'Network Map', 'Internet', 'Wireless', 'USB Sharing', 'HomeCare', 'Guest Network', and 'TP-Link Cloud'. The main content area displays a network diagram with 'Internet' (0 KB/s), 'Router', 'Wired Clients' (2), 'Wireless Clients' (0), and 'USB Disk'. Below the diagram, the 'Internet' status is shown as 'WAN port is unplugged' with a connection type of 'Dynamic IP' and an IP address of '0.0.0.0'.

5. Navigate to **Network > Internet**
6. Set **Internet Connection type**: to **Dynamic IP** and click **Save**

The screenshot shows the TP-Link Advanced Setup page with the 'Network' menu item highlighted in the left sidebar and 'Internet' selected. The 'IPv4' configuration section is visible, with 'Internet Connection Type' set to 'Dynamic IP' (highlighted with a red box). The configuration details are as follows:

IP Address:	192.168.0.1
Subnet Mask:	255.255.255.0
Default Gateway:	192.168.0.1
Primary DNS:	1.1.1.1
Secondary DNS:	2.2.2.2

Buttons for 'Renew' and 'Release' are located at the bottom of the configuration section.

7. Navigate to **Network > IPTV**

8. Enable **IPTV** and set the **ISP Profile** to **New Zealand-UFB** and click **Save**

The screenshot displays the TP-Link web interface for configuring IPTV. The interface is divided into a left sidebar and a main content area. The sidebar includes sections for Status, Network, Operation Mode, Wireless, and Guest Network. The 'Network' section is expanded, showing options like Internet, LAN, IPTV, DHCP Server, Dynamic DNS, and Static Routing. The 'IPTV' option is selected and highlighted. The main content area shows the 'Advanced' tab for the 'IPTV' configuration. The 'IPTV' section is titled 'IPTV' and contains several settings: IGMP Snooping (unchecked), IGMP Proxy (unchecked), IGMP Version (set to '-Please Select'), Wireless Multicast Forwarding (unchecked), and IPTV (checked). The 'ISP Profile' is set to 'New Zealand-UFB'. Below these settings, there are fields for Internet VLAN ID (10), Internet VLAN Priority (0), and a checked checkbox for '802.1Q Tag'. At the bottom right, there is a 'Save' button.
